Invented for babies' Diaper Rash

To Oxygen or Air Source

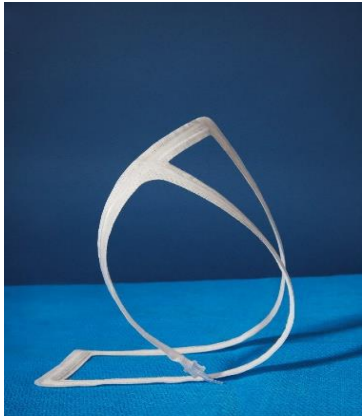

Engineered for adult & pediatric wounds

Easy to use in homes and institutions

- **US Patent:** 8978265 “Bandage/ Diaper Aeration Device”.
Granted 2015.

- Disposable Topical Oxygen Moist Wound Therapy Device
- Connects to all sources of humidified respiratory oxygen/air
- Successfully clinically tested

IRB-
approved

Case
Studies

Florida Hospital Phase 0 Pilot Study.

- Patients: 10 Ages: 54-88
- Diagnoses: Stage 2 Pressure ulcers; Severe IAD, Macerations, Excoriations

Special Case Study

- Patient: 86 years old
- Diagnoses: Stage 4 Pressure Ulcer

Long Term Care Case Studies

- Patients: 8 Ages: 68-96
- Diagnoses: Stage 2 pressure ulcers; Severe IAD

- Easy to apply and use
- Quickest time to heal
- Lowest cost-of-care
- Less pain
- Less antibiotic use
- Less surgical procedures
